

OASES from Commssoft chosen by WZL2 in Poland

Press Release – 13 December 2018

The leading Polish MRO organisation, WZL2 (Wojskowe Zakłady Lotnicze Nr 2 S.A.), has chosen OASES, Commssoft's industry-leading MRO IT system, to support its developing commercial operations.

With more than 70 years' experience of repairing, modernising and servicing complex fighter-bomber and fighter aircraft for the armed forces of the Republic of Poland, WZL2 is now approaching civil aviation customers with Bombardier Q400, ATR 42 and ATR72 turboprop airliners, Embraer E-Jet airliners and ultimately Boeing 737NG aircraft.

OASES, with its technical sophistication allied to an intuitive user interface, is structured in a modular format to provide maximum flexibility and scalability. WZL2 has selected the Core, Airworthiness, Planning, Materials, Production, Commercial and Warranty modules which will be implemented initially through Commssoft's Private Cloud service.

Nick Godwin, Commssoft's Managing Director, commented:

"We're delighted to be welcoming WZL2 to the growing international OASES family. This is our tenth new contract signing in 2018 and WZL2 will be our fourth customer in Poland. Initial implementation meetings have already taken place and we are looking forward to OASES going live very soon."

OASES is currently being used to support more than 130 aviation operations in over 55 different countries, including national and regional carriers, business aviation and charter operators, cargo specialists, leasing companies, MROs and specialist rotatable stockists.
