## RVL GROUP SIGNS 5 YEAR DEAL TO USE OASES

East Midlands-based RVL Group is the latest company to sign a contract to use Commsoft's flagship OASES product to control its varied fleet of multi-role specialist operations aircraft. The five-year, five-concurrent user contract will support RVL Group's mixed fleet of nearly 20 light twin piston and turboprop aircraft.

Specialist aviation services provider RVL Group has been trading since 1985, and consists of an airline, an aerial work company and an aircraft engineering facility. It operates and maintains its own fleet, providing services to a range of private and public sector clients throughout Europe, the Middle East and Africa. RVL Group offers expertise in areas as diverse as aerial surveillance and survey, passenger and cargo ad-hoc and long-term charter, temporary and permanent aircraft modifications for project work, and aerial spraying of pollution dispersants.

OASES (Open Aviation Strategic Engineering System) is a 'best-of-breed' MRO IT system which offers an industry-leading technical sophistication. One of its key selling points is its ease of use: OASES was designed by engineers for engineers; making it straightforward yet highly sophisticated. The software can either be installed on-site on a local hardware server, or it can be accessed via the internet through Commsoft's hosted service.

Speaking about the growing popularity of OASES, Commsoft's Managing Director, Nick Godwin commented: *"2014 was a significant year for us. Some of the changes we introduced, including major service and development enhancements, mark a new era in the history of Commsoft and OASES. We also saw the international family of OASES users growing still further and we look forward to working ever more closely with all of our customers throughout 2015 to ensure that the ongoing development of OASES is as responsive to their needs as can be."*
